TARIFF FORMAT

- A.** Page Numbering - Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially. From time to time new pages may be added to the tariff. When a new page is added between existing pages, a decimal is added to the preceding page number. For example, a new page added between Pages 3 and 4 would be numbered 3.1.
- B.** Page Revision Numbers - Revision numbers also appear in the upper-right corner of the Page. These numbers are used to determine the most current page version on file with the Commission. For example, 4th Revised Page 4 cancels 3rd Revised Page 4.
- C.** Paragraph Numbering Sequence - There are various levels of paragraph coding. Each level of coding is subservient to its next higher level of coding. For example,
2.
2.1
2.1.1
2.1 .1.A.
2.1.1 .A.1.
2.1.1 .A.1 .(a)
- D.** Check Sheet - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current page on file with the Commission.

2.22 Directory Listings

2.22.1 The Company does not publish a directory of subscriber listings. The Company, however, does arrange for the Customer's main billing number to be placed in the directory or directories of the dominant local exchange carrier.

2.22.2 The rates and regulations specified herein for directory listings apply only to the alphabetical section of the directory. Listings are intended solely for the purpose of identifying subscriber's telephone number and as an aid to the use of telephone service.

2.22.3 The listings of subscribers, either without charge or at the rate specified within this tariff for other listings are arranged alphabetically and are not intended for special prominence of arrangement. In accepting listings as requested by subscribers or prospective subscribers, the Company will not be a party to controversies between subscribers as result of the publication of such listings in the directories.

2.22.4 Listings must conform to the Company's specifications with respect to the directories. The Company reserves the right to reject listings when in, its sole judgment, such listings would violate the integrity of company records and the directories, confuse individuals using the directory, or when the customer cannot provide satisfactory evidence that he is authorized to do business as requested.

2.22.5 The Company reserves the right to limit the length of any listing to one line in the directory by use of abbreviations when, in its sole judgment, the clearness of the listing and the identification of the subscriber is not impaired.

2.22.6 Generally, the listed address is the location of the subscriber's residence.

SECTION 3 – DESCRIPTION OF SERVICE

3.2 Product Descriptions (continued)

3.2.4 Optional Features

Caller ID – Deluxe (Caller ID Name and Number Delivery) With Anonymous Call Rejection or Without Anonymous Call Rejection

Caller ID – Deluxe permits the end-user to view a Directory Name and Directory Number of the calling party on incoming telephone calls. Information is displayed on specialized customer provided equipment. The feature also provides the name and time of each incoming call. It is the responsibility of the Customer to provide the necessary CPE. In some situations, the calling party's city and state may be displayed rather than a directory name, depending on available call data.

Call Waiting – Basic

Call Waiting provides a tone signal to indicate to a customer already engaged in a telephone call that a second caller is attempting to dial in. It permits the customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting is provided with the feature and allows a Call Waiting end-user to disable the Call Waiting feature for the duration of a single outgoing telephone call. Cancel Call Waiting is activated by dialing a special code prior to placing a call, and is automatically deactivated when the customer disconnects from the call.

Three-Way Calling

Three-Way Calling permits the end-user to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original part for a three-way conference. The end-user initiating the conference controls the call and may disconnect the third party to re-establish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming calls.

Call Return

Upon the activation of this feature, the customer will receive a voice announcement stating that Call Return has been accessed. In addition, the announcement will provide the Directory Number (DN) of the last incoming call. In some location, the date and time of receipt of the call will also be provided. The Call Return user will then be prompted to enter an additional digit to continue with the feature activation, or to hang up to abort the activation.

SECTION 3 – DESCRIPTION OF SERVICE

3.2 Product Descriptions (continued)

If the last call originated from a telephone where delivery of the number was suppressed, either via a per call or per line blocking, that number will not be available for voicing-back and the call cannot be returned by the Call Return customer. The Call Return user will receive a voice announcement stating that this service cannot be used to call the number.

Call Block

This feature provides the customer the ability to prevent incoming calls from up to six different telephone numbers. A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by pre-selecting the telephone numbers to be blocked. When a call is placed to the customer's number from a number on the screening list, the caller received an announcement indicating that the party he is attempting to call does not wish to receive his call at this time. This feature will not work if the incoming call is from a telephone number in a multi-line hunt group unless the telephone number is the main telephone number in the hunt group, or is Telephone Number identified. This feature will not block calls from coin or cellular telephones or operator assisted call.

Call Forwarding Variable

This feature transfers incoming calls to another telephone number by dialing a code and the telephone number to which calls are to be transferred. Calls may be transferred to a toll point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. This feature is activated and deactivated by the end-user. Since the "forwarded to" number is not pre-selected, a service order is not required.

Call Forwarding Don't Answer – Basic

Call Forwarding Don't Answer automatically routes calls placed to the customer's number that are not answered within a designated number of rings to another pre-selected telephone number. Call Forwarding Don't Answer is programmed in the central office and works automatically. No feature activation is necessary. At the time Call Forwarding Don't Answer is ordered, the customer specifies the designated number of rings and the pre-selected telephone number to receive calls. If the telephone number the calls are to be forwarded to is busy, the caller will receive a busy tone.

Call Forwarding Busy Line - Basic

This feature permits the forwarding of incoming calls when the end-user's line is busy. The forwarded number is fixed by the end-user service order.

SECTION 3 – DESCRIPTION OF SERVICE

3.2 Product Descriptions (continued)

Remote Access to Call Forwarding

Remote Access to Call Forwarding permits the end-user to automatically forward all incoming call to another telephone number, and to restore it to normal operation at his/her discretion. The end-user must dial an activation code along with the forward-to number to turn the feature on. A separate code is dialed by the end-user to deactivate the feature. Feature activation may be performed from the end-user's exchange line or remotely from some other line. Remote access requires the end-user to: (1) dial a special access number; (2) enter their seven-digit telephone number; and (3) enter a personal identification number prior to forwarding their calls.

3.2.5 Extended and Expanded Area Calling Services

Extended and Expanded Area Calling Service allows the Customer to make calls to specific NXX codes within designated exchanges outside the Customer's Local Calling area without paying intraLATA toll rates. The Customer is billed per call according to the duration of the call. The Company will mirror all existing extended and expanded calling areas the ILEC currently has in place for facilities-based or resold services.

SECTION 3 – DESCRIPTION OF SERVICE

3.3 Lifeline and Link-Up

3.3.1 The Lifeline and Link-Up program is designed to increase the availability of telecommunications services to low income subscribers by providing a credit to monthly recurring local service for qualifying residential subscribers and a credit to recurring installation and service charges to qualifying residential subscribers. Basic terms and conditions are in compliance with the FCC's order on Universal Service and specific terms and conditions are as prescribed by the Carolina Public Service Commission and are as set forth in this tariff.

3.3.1.A Lifeline and Link-Up are supported by the federal universal service support mechanism.

3.3.1.B Federal baseline support for Lifeline is eight dollars and twenty-five cents (\$8.25) is available for each Lifeline service and is passed through to the subscriber. An additional three dollars and fifty cents (\$3.50) credit is provided by the Company. Supplemental federal support of one dollar and seventy-five cents (\$1.75), matching one half of the Company contribution, will also be passed along to the Lifeline subscriber. The total Lifeline credit available to an eligible customer in South Carolina is thirteen dollars and fifty cents (\$13.50). The amount of credit will not exceed the charge for local service, which includes the access line, the Subscriber Line Charge and local usage.

3.3.1.C A federal credit for Link-Up of fifty percent (50%) of the non-recurring charges for connection of service, up to a max. of thirty dollars (\$30.00), is available to be passed on to the subscriber.

3.3.1.D Customers eligible under the Lifeline program are also eligible for the Link-Up program. One low income credit per household is applicable to the primary residential connection only. The named subscriber must be a current recipient of any of the low income assistance programs identified in 3.1.7 F following. A Lifeline customer may subscribe to any local service offering available to other residence customers.

3.3.1.E Since the Lifeline credit is applicable to the primary residential connection only, it may not be applied to a multiple line package local service offering. Toll blocking will be provided at no charge to the Lifeline subscriber. The Federal Universal Service Charge nor the South Carolina Intrastate Universal Service Surcharge will be billed to Lifeline customers.

3.3.1.F In order to qualify for the Lifeline or Link-Up programs, a customer must be a current recipient of any one of the following low income assistance programs.

- A. Temporary Assistance to Needy Families (TANF), previously known as AFDC.
- B. Food Stamps
- C. Medicaid

3.3.1.G The customer must furnish proof of qualification at the time the application for service is submitted and the credits will not be established until the Company has received proof of eligibility.

Page Numbering - Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially and from time to time new pages may be added to the Tariff. When a new page is added between existing pages, a decimal is added to the preceding page number. For example, a new page added between Pages 3 and 4 would be numbered 3.1.

Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).

- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

Check Sheets - When a Tariff filing is made with the Commission, an updated check sheet accompanies the Tariff filing. The check sheet lists the pages contained in the Tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision, all revisions made in a given filing are designed by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it. The Tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

Either Customer or Company shall have the right, without cancellation charge or other liability, to cancel the affected portion of the Service, if the Company is prohibited by governmental authority from furnishing said portion, or if any material rate or term contained herein and relevant to the affected Service is substantially changed by order of the highest court of competent jurisdiction to which the matter is appeal, the Federal Communications Commission, or other local, state or federal government authority.

The written notice may be separate and apart from the regular monthly bill for service. Customer shall be deemed to have canceled Service as of the date of such disconnection and shall be liable for any cancellation charges set forth in this Tariff. The Company agrees that any cancellation of service shall be in full compliance with all applicable rules and regulations of the Commission, including Commission Rules 103-622,625 and 626. Any conflicts that exist between these tariff provision and applicable Commission rules will be resolved in favor of the Rules, as interpreted by the Commission.

2.5.2. Without incurring any liability, the Company may discontinue the furnishing of Service(s) to a Customer upon five business days written notice if the Company deems that such action is necessary to prevent or to protect against fraud or to otherwise protect its personnel, agents, facilities or Services under the following circumstances, except under extreme cases where the customer may be disconnected immediately and without notice:

No charges will be levied by the Company for incomplete calls.

2.10. Tax and Fee Adjustments

2.10.1. All state and local taxes (i.e., sales tax, municipal utilities tax) are listed as separate line items and are not included in the quoted rates.

2.10.2. The Company may adjust its rates and charges or impose additional rates and charges on its customers in order to recover the amount it is required by governmental or quasi-governmental authorities to collect from or pay to others in support of statutory or regulatory programs. Examples of such programs include, but are not limited to, license fees or taxes, franchise fees, occupation taxes, the Universal Service Fund, the Primary Interexchange Carrier Charges, and compensation to payphone service providers for use of their payphones to access the Company's services.

2.11. Method for Calculation of Airline Mileage

2.11.1. The airline mileage between two cities can be calculated using the Vertical (V) and Horizontal (H) coordinates of the serving wire centers associated with the Company's POP locations. The method for calculating the airline mileage is obtained by reference to AT&T's Tariff F.C.C. No. 10 in accordance with the following formula:

$$\text{the square root of: } \frac{(V1-V2)^2 + (H1-H2)^2}{10}$$

where V1 and H1 correspond to the V&H coordinates of City 1 and V2 and H2 correspond to the V&H coordinates of City 2.

Example:

	<u>V</u>	<u>H</u>
City 1	5004	1406
City 2	5987	3424

$$\text{the square root of: } \frac{(5004-5987)^2 + (1406-3424)^2}{10}$$

The result is 709.83 miles. Any fractional miles are rounded to the next higher whole number; therefore, the airline mileage for this example is 710 miles.

2.12. Time of Day Rate Periods

- 2.12.1. Time of Day Rate Periods are determined by the time of day at the location of the Calling station.

Appropriate recurring charges and/or Nonrecurring Charges and other terms and conditions will be developed for the Customer for the provisioning of such arrangements.

2.14. Inspection

- 2.14.1. The Company may, upon notice, make such tests and inspections as may be necessary to determine that the requirements of this Tariff are being complied with in the Installation, operation or maintenance of Customer or the Company equipment. The Company may interrupt the Service at any time, without penalty to the Company, should Customer violate any provision herein.
